What did you like most about this course and/or the instructor's teaching?

This was one of the hardest courses I've taken in UML, but was also one of the most valuable. I learned more in this course than I ever thought I would.

What about this course and/or the instructor's teaching needs change or improvement?

The makefiles were awful for me. I would suggest branching away from that, but despite my dislike for it, it's a valuable skill to develop. Also, please no more EE questions in the exams, or possibility thereof.

Additional comments:

One of my favorite professors now.

What did you like most about this course and/or the instructor's teaching?

The instructor was excited about the material which helped keep me interested. He made analogies that made sense.

What about this course and/or the instructor's teaching needs change or improvement?

Grading! A lot of the assignments seemed unfair and overly tedious due to the turn in process.

Additional comments:

The lectures are great; I never want to miss a class, but the turn-in process was painful. I felt I lost points on correct assignments because the turn in was somehow wrong.
